

Project Title : Crime Trends in Boston

Background:

Boston, known for its rich history and diverse population, faces the same crime-related challenges as any other large city. To address these challenges, it's crucial to have a clear understanding of the crime trends and patterns in the city.

Scope:

This project centers around analyzing the reported crimes that took place in Boston during the year 2021. The data will be obtained from publicly available records and stored in an SQL database. SQL queries will be utilized to extract relevant information and uncover patterns, trends, and insights about crime in the city.

Mission Objective:

The primary aim of this project is to gain a deeper understanding of crime in Boston in 2021 through a thorough analysis of the data. The project intends to provide a comprehensive overview of crime in the city, including the type, frequency, and location of crimes reported. It will also examine the trends in crime over time and identify any areas of the city with higher crime concentrations. Furthermore, the project will investigate the factors that may have contributed to the crime rate in the city and offer recommendations for improvement.

Final Outcome:

The project will culminate in a report that presents the findings of the analysis and provides a comprehensive overview of crime in Boston in 2021. This report will serve as a valuable resource for law enforcement agencies, government officials, and the general public who are interested in understanding crime trends in the city.
